

Lessons learned and challenges ahead

The inaugural Chapultepec Conference featured a keynote speech by Agustín Carstens and discussions on payment integration and monetary policy in the Americas.

Economic impact of extreme weather

Droughts, storms and wildfires can reduce economic output and temporarily raise food or energy prices.

Interlinking fast payment systems

Emerging markets and developing economies have made considerable progress in fast payment adoption; interlinking is the next step.

Global real house prices decline

Global house prices declined by 1.6% year on year in real terms during the third quarter of 2024.

Putting AI agents through their paces

For the time being, Ai agents are likely to serve as capable co-pilots that enhance the work of human operators rather than as autonomous agents that displace human workers.
